About Sakaramenta

Due to the Corona crisis, there is a great need for medical protective gear and hospital furniture in Malawi. Importing is almost impossible due to the closed borders and high world-wide demand. Sakaramenta has a history of great workmanship and a well established range of hospital products and is now expanding production with protective gowns and face-

shields made from local materials to assist the Malawian Health Care Workers. Sakaramenta Ltd is founded as a social enterprise. Since the start in 2009 none of the profit has been distributed to shareholders. Our goal is to create local jobs and produce useful products for the Malawian Society in a sustainable way.

Hospital equipment for Queen Elizabeth Central Hospital in Blantyre.

Malawian hospitals need your help!
